

A Best-in-Class iOS App

Welcome to a Best-in-Class iOS App Preview

Thank you so much for checking out the preview, let me help you get started!

There are preview chapters from each book in the series. There are two chapters from each of them, and the preview is well over 100 pages in length:

1. **Accessibility:** The Rotor Control
2. **Accessibility:** Dynamic Type
3. **Design:** The Fidelity Problem
4. **Design:** Finding Your App's Voice
5. **User Experience:** Custom View Controller Transitions
6. **User Experience:** Text That Works
7. **iOS Frameworks:** Drag and Drop
8. **iOS Frameworks:** Live Photos

These will give you the feel you can expect for each of the other chapters. The book series will cover Accessibility, Design, User Experience, iOS APIs and Frameworks. When you purchase the book series, you'll also receive a "Tips Journal" with entries you can read in five minutes or less.

The book series is updated throughout the year, most notably when a new version of iOS releases. In the two and a half years leading up to the first version, I released over 50 updates. To see what I have done and what's written, go visit the website and click on "Release Notes" at the top:

<https://www.bestinclassiosapp.com>

The Books

In the downloads folder, you'll find the preview in all available formats. If you buy the book series, I have instructions which show you how to easily receive updates going forward.

The books should work just fine in Kindle, Books and PDF readers.

The Community

In the book package, you can also join the Best-in-Class Buddies Discord server to chat all about the book, iOS, indie apps and more. Download the app for free from the App Store here if you later decide to buy the book series, and the Discord server invite will be included in the download:

Discord - Talk, Chat, Hang Out

Discord is where you can make a home for your communities and friends. Where you can stay close and...

The Xcode Project

In the full version, I include an Xcode project along with the book series. This isn't part of the preview, however. The project has all the code samples from the book for your reference.

Reach Out

If you have any other questions, you can reach me here:

- @jordanmorgan10 on X
